

Save Your Worn Tires

You Can Get 5,000 to 10,000 More Miles out of them by using Gates Half-Sole Tires. We will put them on for you and change your old tires into new ones at about one-half the price you would have to pay for new tires.

Your tire comes into our plant, worn and scarred from service, and we deliver it back to you—the same tire—made oversize and with a brand-new non-skid tread of fresh rubber. Not a square inch of your old tire will be left, and you will not be able to tell it from a new tire.

GATES HALF-SOLE TIRES

Are absolutely guaranteed for 3,500 miles of wear without a puncture—and many more are averaging from 5,000 to 10,000 miles. You cannot get this kind of guaranteed service from any tire on the market without paying two or three times the cost of a Gates Half-Sole Tire.

LET US SHOW YOU

Don't throw away another worn tire until you have investigated the Gates Half-Sole. If you are paying the tire bills you will be interested in this kind of service from any tire on the market without paying two or three times the cost of a Gates Half-Sole Tire. We guarantee it.

Get 5000 More Miles

COMMUNITY BAZAAR ORGANIZED

Monday evening a few public spirited women of Logan met and formed what is to be known as the community bazaar organization. While the bazaar is given as a benefit for the Cache County Chapter of the Red Cross, the organization is acting as an independent unit and the work is being done through the Mutuals and Relief Societies of the different wards. The officers of the organization are:

Mrs. Charles Blitter, chairman.
Mrs. E. T. Lewis, and Mrs. Clara Price, vice chairmen.
R. A. Stewart, secretary.
Mrs. W. D. Cranney, treasurer.

Intense and active interest is being shown in this worthy effort by the citizens of Logan and the response in contributions of every kind is extremely generous.

Interest is particularly keen in the raffling feature of the bazaar which is under the direction of Mrs. E. T. Lewis. Among the many articles that will be raffled off on the 22nd of this month is a pig, donated by Mr. Carl Torp; a calf given by H. J. DeWitt; a fruit cake given by Mrs. J. P. Smith.

Another interesting event to be

given in the near future as a benefit for the local chapter of the Red Cross will be the big basketball games now being promoted by the Commercial Boosters' Club.

One group of contestants will be chosen from the business men of Logan while the other will be composed of student teams from the North Cache and South Cache High Schools.

Tickets will be sold in advance for the game which is to be held in the gymnasium of the B. Y. C. and also for the big dance to be given afterwards in the Auditorium.

ATHLETIC BUNK

The B. Y. U. is certainly a hard luck school. They have only four hundred students and it takes five men to make a basketball team. It puts a tough proposition up to Coach Roberts to find a team.

L. H. Peterson, has been using the long distance telephone for the last couple of days, talking to Logan, Salt Lake City and Colorado points relative to the eligibility of Raile and Simmons. He finds it expensive and as well as a lot of extra unnecessary trouble.

Roberts of Provo, is certainly an expert when it comes to pulling all his according to his story he has built three different teams this year, and

every time somebody would object to his lineup. After several championships Roberts hates to be talked to relative to rules, etc.

The Aggie basketball team will have their hands full to defeat the much taunted B. Y. U. team tonight.

The South Cache High School team under the direct of Jack Wright is right up in the lead for the division championship. We hope he can win out.

The North Cache High School team is also in the running for the Division Championship and we wish them success also.

The B. Y. C. has to take a little dirt from their big slater the B. Y. U. during the past year. It is too bad that the B. Y. U. can't act like a big brother and be on the square.

It would be some joke if the B. Y. U. would refuse to play tonight unless the Aggies would allow Raile and Simmons in the B. Y. U. lineup.

With the fight the B. Y. U. is known to have, and the over-confidence of the Aggies we dare not predict any score for tonight.

The Aggies are suffering from a dose of over-confidence and Provo has an excellent chance to get revenge at the Aggies.

Captain Spencer is going good this week, and he promises to keep going tonight.

NOTICE TO AUTO OWNERS

Spring is approaching and your car needs new tires. Call 605-J and let us come and show you the Gates Half Sole Tire. Makes your old tires new and oversize with a puncture proof guarantee of 3500 miles. The Gates Half Sole Tires only cost about half as much as new tires of the same size.

Sheep—Receipts, 64; market, steady; lambs, \$14 to \$15; ewes, \$9 to \$10.50.

SAYS PUBLISHED STATEMENTS UNTRUE

"Moroni Mortenson of Bear River City, one of the county's most skilled and successful farmers, and who was the secretary of the farmer's meeting held there last week, denounces as untrue the statements appearing in the Brigham Journal, and in the Salt Lake Herald Republican, respecting Mr. C. G. Patterson and declares most of the statements appearing in those papers to be absolutely untrue. He requests us to say:

"I wish to denounce the unfair, untruthful and uncalled for attacks on Mr. C. G. Patterson, which have appeared in the Salt Lake Herald Republican and the Box Elder Journal. I opposed some parts of the resolution presented by Mr. Patterson, particularly the last paragraph demanding that the sugar companies be made to act fairly before the farmers would contract to grow sugar beets. As to the resolution in general I favored it. I voted against it because of the paragraph referred to. The vote for it was two to one. There was no discussion in the meeting whatever as to a demand for \$10 a ton for sugar beets, neither was there anything said about the association of which Mr. Patterson is a member, 20 cents a ton or any other sum if the price was fixed at \$10 a ton. The statement that all but about 70 of the 300 farmers left the room is an absurdity. A few of the farmers left because of the lateness of the hour and the distance to drive home, not because of any feeling. The only personal incident of the meeting was a tilt between Mr. Patterson and John P. Holmgren. Mr. J. T. Bigler, mentioned in the same connection with myself, joins with me in denouncing the inexcusable attack on Mr. Patterson."

MORONI MORTENSON.

VINCENT ASTOR ON DUTY

U. S. NEEDS PLATINUM; GIVE WHAT YOU HAVE

Great Quantity of Rare Metal Is Required by War and Navy Departments.

Washington, D. C.—Look in your jewel box and see if you have any platinum there. If so, give it or sell it to Uncle Sam, who needs it to help fight the war.

A great quantity of platinum is needed by the war and navy departments for certain delicate parts of the ignition systems of motor boats, airplanes and motor cars to be used in America's part of the fight against Germany.

Nothing else will take the place of platinum in the manufacture of sulphuric acid, so indispensable for the making of smokeless gunpowder. In the form of "fulminate" it is used for cartridge caps, shell fuses and "detonators" for all sorts of projectiles, and hand grenades and bombs.

Fulminate of mercury also is one of the most powerful of explosives. It is also one of the most sensitive, so much so that it cannot be handled with any degree of safety, except by experts. For war use it is put in small metal capsules, the tiniest quantity of which is sufficient to start into action the most lazy explosives loaded in projectiles.

This country produces not more than ten per cent of what it consumes in peace times, and Russia, whose output for many years has represented 95 per cent of the world production, is now mining less than one-fourth of the quantity she supplied prior to the war. The precious mineral which some years ago was worth only a little more than \$23 an ounce, has today a market value of over \$100 an ounce.

The rarity of the metal is seen when the world's production since 1843 has been less than 100 short tons. A great bulk of this amount was found in the Ural mountains, where miners go after it by digging pits to a depth of 15 feet or more, and then burrow, rat fashion, in every direction. Fifteen pounds of platinum is the average yield for every 29 cartloads of gravel taken out and washed.

MILLIONAIRE STILL WORKS

Soap Demonstrator Inherits a Fortune, But Holds His Job.

There are not many millionaire soap demonstrators in the United States, perhaps not more than one.

There is at least one, and he was in Tulsa, Okla., last week standing guard over a booth being operated during a seven-day demonstration of commodities instituted by a local grocery concern.

To a newspaper man, who had known him some time, he confided his secret. Two years ago he fell heir to property and investments worth \$2,800,000, submitting proof of same. His name is William Fritchle and he represents a Kansas City soap company. In addition to being a millionaire, he claims the distinction of being a direct descendant of Barbara Fritchle, the heroine of Whittier's famous poetical effort.

He announces he likes his work, wants to work, and does not propose to permit his wealth to interfere with his labors.

HUCKSTER LEFT \$57,000

Sister and Brother Inherit Estate—Mostly Realty.

Stephen Dempsey, a huckster, who died recently at his home in St. Louis, owned real estate with an assessed valuation of \$55,000. He was a bachelor, and his only heirs are a sister, Miss Ellen Dempsey, who lived at his home, and William Dempsey, a brother, also a huckster.

Each wanted to administer the estate but Attorney Daniel J. O'Keefe effected a compromise by which a real estate man will act as administrator. Dempsey also had \$1,500 worth of personal property.

The Humanities.
The humanities are those branches of education or study which are included in what are called elegant learning, as languages, grammar, philosophy and poetry, including the ancient classics, an educator says. The name implies that the study of these branches has a tendency to humanize man, to cultivate particularly those faculties which distinguish him as a man in all his relations, social and moral; that is, which make him a truly cultured man.

Won a Wife by Billiards.

"Three years ago," writes W. N., "a friend and myself were equally infatuated by a certain young lady, and seemed to have about equal chances of winning her. In order to 'play fair,' we decided to play 100 up at billiards, the winner to have the first chance of proposing. After a neck-and-neck struggle I just won by a fluke. All I need add is that—I wish I hadn't!"—Exchange.

Drive Turkeys to Market.

In some sections of Texas turkeys are driven to market. In one instance a flock of 8,000 turkeys was driven 13 miles in two days. Twice a year a train called the "turkey special" leaves Morristown, Tenn. Carloads of turkeys are sent to Morristown from the surrounding country, and these are made up into one train and rushed to New York. Each car contains about 1,200 birds and a man is sent to care for them. In spite of all possible speed and care, however, the birds are said to lose about 12 per cent of their weight in shipment.

Should Keep Piano Dry.

The most frequent cause of keys sticking in pianos is damp. Keep the instrument in a dry room, out of any draught, and in as even a temperature as possible. Take off the keyboard cover, and rub the damp key underneath and down the sides with fine emery paper, this will probably remove the damp, thoroughly dry the key bed, that is underneath where the key fits, and replace the key.

Parting Wedged Drinking Glasses.

Drinking glasses and similar articles often become wedged together so firmly that it is difficult to part them without damage. A simple method of parting glasses is to pour cold water into the inner glass and set the wedged glasses upright in a dish of warm water, which should then be gradually heated by pouring hot water into it. The contraction of the inner glass and the expansion of the outer one will release the two.

Ruse to Get Auto Ride.

Willie's father does not own an auto, but a good friend of the family has a seven-passenger car. One Sunday afternoon the little one became restless and was wishing some one would come and take them for a ride. Finally he said: "Daddy, call up the Johnsons and ask them if they wouldn't like to take a walk with us—and daddy, tell them to be sure and bring their auto."

Honest Confession.

No man can ever lack this mortification of his vanity, that what he knows is but a very little in comparison with what he is ignorant of. Consider this, and instead of boasting thy knowledge of a few things, confess and be out of countenance for the many more which thou dost not understand.—Thomas A. Kempster.

Arabs Love Turkish Delight.

The confection known as "Turkish delight" is the most important used by the Arabs of Arabia, reports United States Consul Addison E. Southard of Aden. This is made from sugar and American starch, with flavoring and sometimes almonds or the kernels of ground nuts. Turkish delight often makes up the bulk of the Arab's breakfast, and it is eaten often at other times.

To Detect Coloring Matter.

To ascertain whether artificial coloring matter has been added to tea, place a small quantity of tea on a piece of white paper, and rub with an ordinary table knife until the leaves become a fine powder. Now brush the paper with a bristle brush, and if any Prussian blue has been used for coloring purposes there will be little streaks of this all over the paper.

Miraculous Virtue.

Gaze thou in the face of thy brother, in those eyes where plays the lambent fire of kindness, or in those where rages the lurid conflagration of anger; feel how thy own so quiet soul is straightway involuntarily kindled with the like, and ye blaze and reverberate on each other, till it is all one limitless, confluent flame (of embracing love, or of deadly grasping hate); and then say what miraculous virtue goes out of man into man.—Carlyle.

Starting the Clock.

If a clock refuses to run after being wound owing to the need of cleaning, try this: Roll a bit of cloth, tie it well so it cannot unroll and saturate it with coal oil. Place the roll in the bottom of the clock, well out of the way of the pendulum. After the fumes of the oil have had time to do their work—say from ten to twelve hours—wind and start the clock, and if nothing is broken it will run.

What You Ought To Know About "The Thing We Love"

Two big stars, Wallace Reid and Kathryn Williams, who worked together in the Paramount production, Big Timber, some time ago, which met with a tremendous success, are the stars of "The Thing We Love."

This is a season of patriotism. "The Thing We Love" stirs one of the deepest of human emotions—patriotism. It is a story of war, without war's horrors.

Founded upon the story by H. B. and M. G. Daniel, "The Thing We Love" has been directed by Lou Tellegen, famed as the director of Madame Sarah Bernhardt's first photograph, and also as her leading man on the stage.

Wallace Reid has appeared with Geraldine Farrar in many of the screen's greatest productions such as Maria Rosa; Carmen, and Joan the Woman. He is one of the most popular male stars of filmdom.

Kathryn Williams, star of Redeeming Love; Out of the Wreck; The Cost of Hatred; The Highway of Hope; and Big Timber, has also a tremendous following. Both are well known. "The Thing We Love" with these two stars will prove a sensation in any community with its patriotic theme and the drawing power of the stars and director.

The cast includes Tully Marshall famous character actor of Oliver Twist fame; Mayme Kelso, Charles Ogle and Billy Elmer, probably the screen's most famous detective.

Harvey Thew, who wrote the scenario, was responsible for the screen versions of many other popular Paramount productions—such as The Sister; The Kiss; The Years of the Locust; The School For Husbands, and others.

Our country's enemies are foxy. They work in the dark and strike a man down from behind. In "The Thing We Love," there is graphically portrayed a Hun plot to injure this country and our Allies, and the way one strong young man and his sweetheart were able to prevent a terrible explosion is shown with vivid intensity.

Keep Grapes Fresh for Months.

Grapes can be kept fresh for several months by inserting their stems through the corks of glass bottles, filling these with water, pressing the corks firmly in, sealing them if necessary with paraffin and inverting the bottles on wooden racks in a cool, dark cellar. The bunches should hang free, their stems sticking up into the water.

Can You Afford Not to Have Music in Your Home?

In most homes there is at least one instrument to satisfy the craving which every normal human being has for music. The only reason there is not a Musical Instrument in Every Home is that some people feel they cannot afford it. This is mistaken economy.

When you deprive your family—particularly your growing children—of the privilege of hearing and making music, you deprive them of one of the big joys of living—a joy that cannot be measured in dollars and cents.

But even when measured in dollars and cents the cost of a reliable and enduring Musical Instrument is surprisingly small. And we are always glad to arrange easy monthly payments on Pianos Organs and Grafonolas, which we have in stock in a wide variety of styles and prices. Come in and let us tell you how easy it will be for you to have Music in Your Home.
